

Universally applicable for industry  
Art.Nr.:1173

The pocket-size stroboscope model MINISTROB 2600 LED is used for rational and vibrating speed measurements as well as for the observation of fast moving periodic or quasi-periodic mechanisms mainly for industrial application.

Special features:  
small dimensions, ultra-light weight, trouble-free, processor-technologie, precise fine adjustment of flash frequency by foil key pad with cursor setting, standby with data-hold function, restart with last measured value by tipping any arrow key, automatic power "OFF" with last measured value stored, stabilized voltage, temperatur constant.

**General Data:**

**Light Source:** 20 white light LED's of high luminous intensity

**Flash duration:** approx. 40 - 180µs

**Frequency range:** 1 - 335 Hz = 60 - 20100 RPM (min-1)

with automatic flash power control

internal oscillator

**Trigger action:**

- Internal control: adjustable via foil pad with cursor function, standby (after 2minutes with data-hold function, automatic switch-off with storage function of the last set value.

via LC Display selectable in Hz (flashes per sec.) or RPM (min-1)

**Display:** <math>\pm 0.1\%</math> of set value

**Accuracy:** automatically

**Flash power control:**

**Technical Data:**

**Power supply:** 9V DC (block-6LR1) battery

**Housing:** shatterproof plastic, black / silver

**Dimensions:** 150 x 80 x 30 mm

**Weight:** 0,250kg

MOVISTROB® Type 2600
